## Introduction

The Legislative Bill Tracking system is an online web application which is available for state agency users and Internet users to track bills and resolutions for the legislative session.

The tracking of legislative bills and resolutions begins with prefiled bills as they are published to the legislative branch website. Non-prefiled bills and resolutions will be available for tracking after they are officially introduced starting on the first day of the legislative session.

## RSS Feeds

### What is an RSS Feed?

**RSS (Really Simple Syndication)** is an XML-based format for sharing and distributing web content, such as news items or other syndicated content. Using an RSS reader, you can view web content feeds from various sources, including headlines, summaries, and links to full content.

RSS feeds benefit publishers by letting them syndicate content automatically. A standardized XML file format allows the information to be published once and viewed by many different programs. They benefit readers who want to subscribe to timely updates from favorite websites or to aggregate feeds from many sites into one place.

RSS feeds can be read using software called an "RSS reader", "feed reader", or "aggregator", which can be web-based, desktop-based, or mobile-device-based. The user subscribes to a feed by entering into the reader the feed's URI or by clicking a feed icon in a web browser that initiates the subscription process. The RSS reader checks the user's subscribed feeds regularly for new work, downloads any updates that it finds, and provides a user interface to monitor and read the feeds. RSS allows users to avoid manually inspecting all of the websites they are interested in, and instead subscribe to websites such that all new content is pushed onto their browsers when it becomes available.

### How does the Legislative Bill Tracking System use RSS Feeds?

The Legislative Bill Tracking System allows you to track bills via RSS feeds for:

- Each of your bill tracking lists
- Each of your committee tracking lists
- Individual bills

Each RSS feed provides updates to bill information, including:

- Unofficial chamber actions (current date only)
- Official chamber actions
  - Daily posting of chamber actions to bill status which occurs as the end of each legislative day
- Scheduled conference committee hearings

System administrators may also send a message to all RSS feeds.
